

Company: Filtrine Manufacturing

Contact: George Hansel

Challenge: Recruiting highly skilled welders is an ongoing challenge. Our aging workforce makes this activity one of our highest priorities.

Approach: In partnership with the Cheshire Career Center, Filtrine hosts both an intermediate and beginner welding course in our facility off hours.

Impact: we are able to introduce members of our community to welding and support a culture that celebrates “making things.” We’re also able to use the classes as a recruitment tool.
