Challenge or Opportunity:

We spend a lot of money and waste a lot of materials by providing paper coffee cups and lids and plasticware.

Approach or Solution:

We stopped providing paper coffee cups and lids as well as plasticware to our team members (they are still available for guests).

Impact:

Assumptions

- 300 team members x 250 workdays/year (ave.)
- 75,000 Cups - \$4,455.00 per year
- 75,000 Lids - \$3,867.00 per year
- Yearly spend –**\$ 8,322.00**
- **\$3750** was the actual spend for a year on plasticware
- Total Annual savings by not providing these is **\$12,072.00**. This does not include how much we paid to have the materials disposed of, but we don't have an easy way to calculate that.
