Company/Organization: Klüber Lubrication

Type of organization: Business

Number of Employees: > 2,200

Category: environment

Challenge or Opportunity:

Lifeboats on ships and the mechanisms allowing for their deployment must be lubricated and maintained to ensure the safety of passengers and crew member. Lubricant can have impacts on the marine environment as well as the health and safety of maintenance staff who have to service often hard to reach points.

Approach or Solution:

Klüber developed a lubrication that is less frequently applied, minimizing the risks to maintenance staff as well as spillage, while saving costs to clients. Additionally, materials used in the lubricants are source responsibly with consideration of the lifecycle of the product and its impact on the environment.

Impact:

Many of our products offered today can already help to cut operating costs, prevent or reduce the generation of waste, save energy and reduce the need for disposal and reprocessing.
